Subject: RE: Report 7: Lab Results Cape Fear River for NC DEQ

Peter, Betsy, Jeff, and Becky –

I am sending a quick follow-up to the email below which you just received from Tim Buckley. I wanted to make you aware that this latest report identifies concentrations of GenX that exceeded the highest value on our calibration curve (i.e., 250 ng/L) for two samples and that GenX was found in Brunswick County finished drinking water at a concentration that exceeds the NC DHHS GenX health goal of 140 ng/L. These results were somewhat unexpected. We had contacted NC DEQ to alert them to these findings in advance of submitting this report, so they could begin thinking about their response. Please let us know if you have any questions. Thank you.

Tim Watkins

Linda,

Please find our latest report of PFAS in Cape Fear water samples that you collected and provided to us.

Tim
